Re: Recycling Makes Sense - a school recycling challenge program

Dear Madame or Sir;

The Lebanon Recycling Center is pleased to announce the kick-off of a school recycling challenge program, RECYCLING MAKES SENSE! This competition intends to gain exposure and awareness of Lebanon's recycling program while educating area children to better environmental stewards of the earth.

The program period begins February 1, 2019 and ends February 28, 2019. This Program is open to all schools (public or private) within the Solid Waste Management (District 'T') tri-county area (Camden, Laclede and Miller counties). Some exclusions apply, please refer to the Terms and Conditions of this Program.

This challenge is focused on two recyclable waste streams; Metals and Household Hazardous Waste (HHW). And there are two ways you school may benefit from participating in this Program.

1. Through metals recycling efforts, redeem program income and spend it as you wish.
2. Win the grand prize by collecting the most overall points! (The grand prize consists of a movie day including popcorn and bottled water, sponsored by Lebanon's Recycling Center, and presented to (up to) 400 students.)

Lebanon hopes you see as much value in recycling as we do, and you will consider participating the Recycling Makes Sense School Recycling Challenge Program. The challenge is less than two weeks away from kick-off date, so please act fast. And GOOD LUCK!

This packet contains a; cover letter, terms and conditions, participant registration form, and a checklist for success. Should the packet arrive incomplete or you'd like to speak with the Program Coordinator, Melissa Myers may be contacted at 417-991-3902. Documents may be emailed to [mmyers@lebanonmo.org](mailto:mmyers@lebanonmo.org) or faxed to Melissa's attention at 417-588-6098.

The Lebanon Recycles for the Earth program is funded in part by the Missouri Department of Natural Resources ("MoDNR") via the Lake of the Ozarks Solid Waste Management District 'T' ("SWMD'T") grant program, and is a FREE service provided to all residents of Camden, Laclede and Miller counties.

Best Regards;
